

THE ENTERPRISE COLLECTION SECTIONAL OVERHEAD DOORS

TITAN 🍏 TELSTAR 🍏 CENTURION 🍏 DISCOVERY

Your business depends on loading access to run smoothly. Apple Door has developed a collection of sectional overhead doors that will meet the needs of any commercial and industrial application. The Enterprise Collection is made up of doors that are rugged, energy efficient and will compliment your building.

TITAN

Titan is an insulated sectional steel door and features a full 3" pressure-injected core of high-density CFC-free polyurethane foam insulation, with an R-Value of 24 - the highest in the commercial door industry. Titan is exceptionally strong, reinforced with roll-formed galvanized steel struts and double-end hinges as required to meet or exceed local wind load specifications. Titan is the ideal door for applications that require both maximum energy efficiency and strength.

3" THICK STEEL SANDWICH CONSTRUCTION

Each Titan section has a double sided galvanized steel with injected insulation forming a "sandwich" construction for maximum strength. Maximum width is 30'2". Maximum height is 20'1".

R-VALUE 24

TELSTAR

Telstar's CFC-free, polyurethane-foam-injected construction offers exceptional benefits for any commercial application. These doors are available in 1-3/8" or 1-3/4" thickness and have an R-Value of 12.35 - 14.55, and use rigid vinyl extrusions with positive thermal breaks to eliminate metal-to-metal contact, which limits temperature transfer. Tongue-and-groove construction and section joint seals at meeting rails provide water and wind resistance.

1-3/8" OR 1-3/4" THICK STEEL SANDWICH CONSTRUCTION

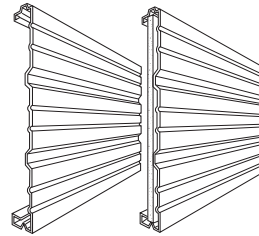

Telstar's section has a double sided galvanized steel with injected insulation forming a "sandwich" creating strength and energy efficiency. Panel options include flush, pencil grooved or raised panel. Maximum width is 38'2". Maximum height is 30'1".

CENTURION

Centurion is available in your choice of 20/24/26 gauge steel and have a semi-flush panel. All models are hot-dipped galvanized steel with epoxy prime coat and top coat of polyester paint.

2" STEEL PAN CONSTRUCTION

Centurion's skin is made of galvanized steel. Optional polystyrene insulation has an R-Value of 5.0 and can be backed with a vinyl or metal. Panel options include semi-flush or raised panel. Maximum width is 24'2". Maximum height is 16'1".

DISCOVERY

Discovery full view aluminum doors are strong, handsome, durable and the No. 1 choice of commercial and industrial architects. Ideal for fire houses, car washes, auto service centers and dealerships, service stations, and tire stores.

FULL VIEW ALUMINUM

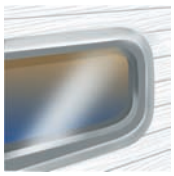

Sections are assembled using .065" minimum aluminum alloy, tubular type extrusions with through bolt construction and are 1-3/4" thick. All doors wider than 12'-2" have built in struts on each section. All aluminum is clear anodized as standard. Color anodizing and special paint finishes are optional. Panels for solid sections are .040" stucco embossed aluminum. A wide variety of glazing materials are available. Max width = 24'2", Max height = 20'1".

ENTERPRISE OPTIONS

GLASS OPTIONS

Lookout Lites - Attractive and practical, the 25" X 12" insulated 1/2" tempered glass window inserts provide superior double-glazed insulation. Seal-tight frames and a new anti-condensation system ensure effective sealing and a bright, clear view. Windows are attached from the inside for easy installation and maximum security.

Full View Sections – When more light is needed one or more full view sections can be added. Glass can be single or double pane insulated in 1/8" or 1/4" acrylic or 1/2" tempered glass, framed with clear anodized aluminum stiles and rails.

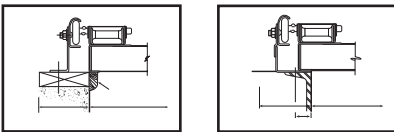

SECTION PROFILES & COLOR FINISHES

Enterprise Collection sectional doors are available in a variety of section profiles. Smooth, flush, pencil groove flush, raised panels are available on most models. Color choices include white, almond, sandstone, brown, bronze, green and grey (model specific).

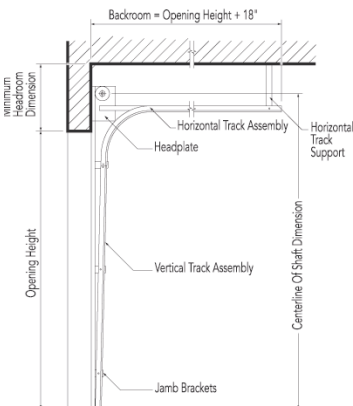

MOUNTING OPTIONS

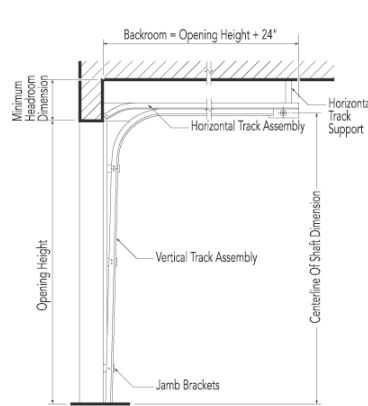

There are two methods of attachment for Enterprise Collection sectional doors. Tracks can be bracket mounted to a wood or steel frame (provided by others). Tracks mounting to wood will be provided with bracket clips, attached by lag screws. Steel frame attachment requires that tracks be provided with reverse angle mounting and can be secured by tech screws or welding.

TRACK OPTIONS

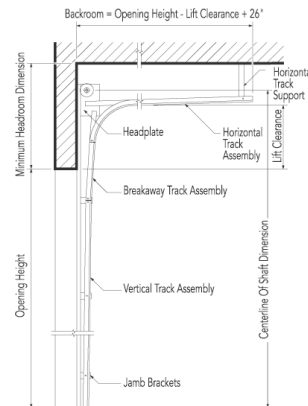

Enterprise sectional doors are provided with 2" or 3" tracks (depending on door size) and are available with the following lift types.

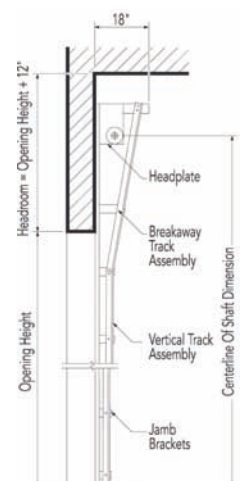

Standard Lift

Low Headroom

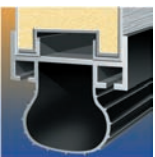

High Lift

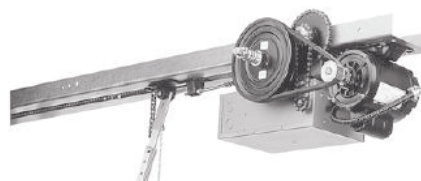

Full Vertical Lift

WEATHERSTRIPPING

Bottom astragal weatherseal is standard on all Enterprise sectional doors. Optional Jamb and header seals are available in vinyl or brush styles. Brush seals are mounted in an aluminum retainer.

OPERATION OPTIONS

All Enterprise doors are provided as manual push up / pull down operation. Optional operating methods include manual chain hoist and electric motor operation. For electrically operated doors, a wide variety of remote controls and control devices can be easily added for maximum operating efficiency and safety. All wiring to motors and controls are provided by others.
