

AMAZINGLY QUIET RESIDENTIAL GARAGE DOOR OPENER

QUIET, SECURE,
AND SAFE

DC TECHNOLOGY

SMART MOTOR™

HEAVY DUTY SOLID
RAIL DRIVE SYSTEM

VIPER IS THE STRONG, SILENT TYPE

Performance doesn't have to be loud. That's why our Viper garage door opener is designed with ultra quiet direct current (DC) motors. These motors provide the patented "Soft Start / Soft Stop" feature which reduces wear and tear on the door and opener. Viper's motor is strong with a lifting capacity comparable to a ¾ h.p and is backed by the most extensive warranty in the industry.

ACCESSORIES AND FEATURES

ACCESSORIES

TRANSMITTERS

Two styles of digital remote control transmitters in three different configurations: 2-channel MINI, 4-channel MINI, and 3-channel MICRO remotes for controlling other devices. Unique, multi-bit technology, LED control button verification.

AUTOMATED DOOR LOCK LOCKMATIC G20

Replaces and renders obsolete manually operated locks (such as slidebars, padlock, etc.) used to secure automated sectional garage doors. It operates with the same controls that operate the LOCMATIC Ready operator such as transmitters, wall control and wireless keyless entry system. Installer friendly, easily connects to work automatically with a LOCMATIC ready operator, simply plug in a harness and connect two wires.

MODULAR MULTI-FUNCTION WALL STATION

Provides door operation and convenience from inside the garage. Compact, stylishly designed to fit in a standard single gang electrical box. Illuminated push-button. Security vacation/lock switch. Light control. Individual control stations can be combined into one solid panel.

WIRELESS KEYLESS ENTRY SYSTEM (WKES)

Convenient, 4-digit PIN. Controls up to 3 different garage doors. Code security. Weather resistant. Provides temporary access to authorized visitors or service personnel.

NEW CONNECTION TERMINALS LOCATION FOR EXTERNAL DEVICES/ACCESSORIES AND MODULAR RECEIVER ANTENNA

- The new external devices/accessories Quick Connect terminals integrate all external devices connections in a central location, **on the rear of the operator**, providing for an easier and quicker installation, easier connectivity verification and aesthetically pleasing installation.
- Innovative concept where the receiver module is simply plugged into the unit. This allows for quick and simple frequency changes.

DRIVE SYSTEM

RAIL

The best in advanced engineering and materials. One piece semi-closed fully assembled drive system with a high strength galvanized steel finished C-rail, available with a steel reinforced belt or a full steel chain. Door Heights Supported: 7ft., 8ft., 10ft., and 12ft. Headroom Clearance Required: 1 1/4" Trolley: Includes emergency release, easy reconnect.
