

The **WeatherMaster** will turn a deck, terrace or patio into an attractive shaded space that can be utilized regardless of the weather. It adds style and elegance to any home or business façade and increases entertainment areas. The **WeatherMaster** canopy also blocks the sun's direct light and lowers radiant heat absorption. This canopy may reduce monthly air conditioning bills and prevent unnecessary replacement costs for faded carpets, drapes and furniture.

**Special Features and Benefits Include:**

- Traditional stationary canopy
- Available with or without side wings
- Turns deck, terrace, or patio into shaded living space
- Protects property and furnishings
- Full selection of acrylic fabric colors and stripes

## GO GREEN on Energy Cost!

### Go Green and Reduce Energy Cost

Durasol retractable awnings effectively filter the sun's light creating a cool and relaxed environment. Solar heat gain is greatly reduced by limiting the amount of direct sunlight that enters a window or door.

The use of fabric awnings will **reduce solar heat by up to 90%\*** and lower indoor temperatures by 10-15%, thus saving 25%\* on air conditioning costs throughout the warmer months.
